

5) inheritance in c#.net

```
using System;
namespace CSharp_Shell
{
    public class Program
    {
        public int rollno = 107;
        public string name="harshali";
    }
    class exam:Program
    {
```

```
        public static void Main()
        {
            exam n=new exam();
            Console.WriteLine(n.rollno);
            Console.WriteLine( n.name);
            Console.ReadLine();
        }
    }
```
